Case Study: Wolverhampton Subway

LIGHTING SOLUTIONS

Location

Subway between Wolverhampton Wanderers and Wolverhampton University.

Project Detail

Using our MAN LED fitting to a bespoke design for a tunnel walkway.

Fitting was designed to be anti-ligature and vandal resistant.

Product Detail

MAN LED Fitting

A superior range of IP54 vandal resistant surface LED luminaires.

Constructed from a rigid steel body and 6mm thick 'cracked ice' polycarbonate diffuser, secured by tamper proof stainless steel bolts.

Suitable for use in secure installations, as well as public areas such as subways, bus stations and other vandal prone areas.
